

I quit listening to FM radio about 4 years ago due to the fact I was forced to listen the crap played over and over on modern radio stations. It seems that record lables' pay off the FM radio stations to play this shit music to push record sales. It's like FM radio tells me what I have to listen to and what is good music and to be honest it is all crappy music. With XM radio I can listen to what ever kind of music I want when ever I want wherever I want to, commercial free and unedited. From reggae to punk from old school to new school. I just couldn't live without it. GO XM RADIO!!!!!!!!!!!!
